Clayton,

I wanted to personally invite you to an online demo of Lumen where we will feature dynamic scoring, facial recognition, and the search of your RMS, CAD, and other data sources all from one system. This demo will also highlight Lumen Vault.

LUMEN VAULT OFFERS A VERY SECURE ENVIRONMENT FOR SENSITIVE LAW ENFORCEMENT DATA

Vault provides a secure, highly available, highly redundant cloud-based law enforcement database solution for storing and managing digital crime scene photos, body-worn camera footage, surveillance videos, and any other law-enforcement-sensitive digital media files. Pay only for what you use; no per-user charges or fees.

What They Are Saying About Lumen

“We noticed a pattern with stolen jeeps and gun stores, ran a few queries in LUMEN and quickly identified a pattern across the Front Range. We generated some suspect information for our local detectives based upon the great work of others in the metro area.” — Crime Analyst

With that one search, we were able to close 36 cases. I even called up two other agencies whose cases showed up in my Lumen search and they were able to close out their cases also. This would have been impossible without Lumen.” – Investigator

“Lumen has fundamentally changed our Sheriff’s Office and the way we look at crime. It has driven our response to crime, revolutionizing the way we handle day-to-day activities.”
-Sheriff Matt Lewis,
Mesa County Sheriff’s Office

"I searched Lumen for cases involving some of the specifics of the case and within 30 seconds I was reading the theft case report from another agency. This allowed us to validate the victim’s side of the domestic violence story, help another agency solve a weapons theft, and charge a suspect.” – Crime Analyst
